

# The Coherent Collective

## Scientific Evidence for a Connected Consciousness

### GLOBAL INFORMATION FIELD & GEOMAGNETIC FIELDS

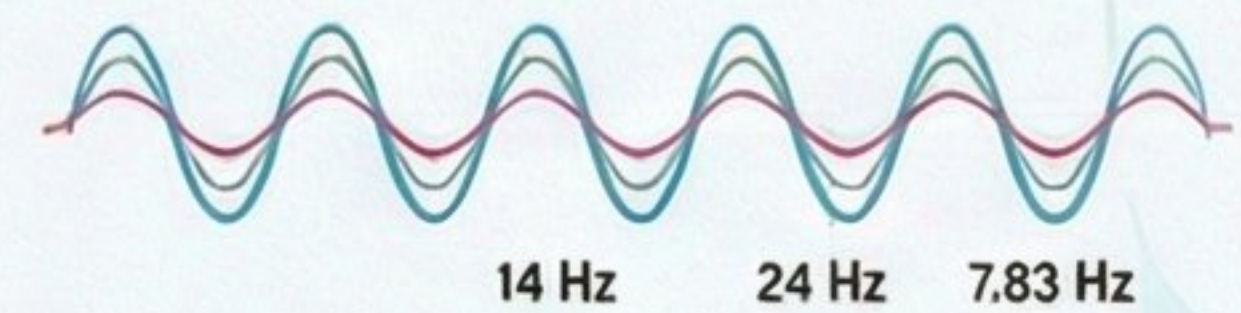

#### All Living Systems are Interconnected

A global information field is theorized to connect all life. We are influenced by Earth's geomagnetic fields, which may act as carrier waves for collective human consciousness.

#### Collective Coherence Can Influence the Planet

GCI hypothesises large numbers of people in heart coherence and intentionally create a stable "standing wave" in the Earth's field to offset global stress.

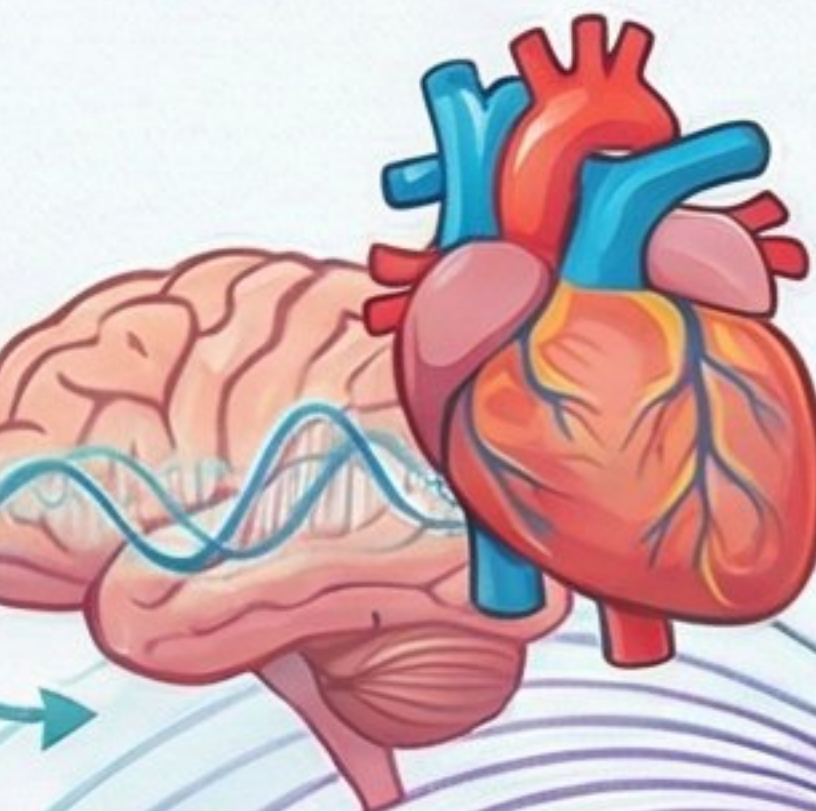

#### Earth's Rhythms and Human Rhythms Overlap

Geomagnetic frequencies (Schumann Resonances) directly overlap with human brain and cardiovascular frequencies, providing a likely mechanism for interaction.

#### Solar Cycles Correlate with Human History

Studies show 80% of the most significant historical events (wars, revolutions) between 1749-1923 occurred during maximum solar activity.

#### Heart Coherence

Positive emotions create ordered, coherent heart-rhythm patterns (HRS), while negative emotions create disordered patterns.

#### Monitoring the Earth's Magnetic Field

GCI is installing a global network of 12-14 ultrasensitive detectors to measure resonances in the Earth's magnetic fields.

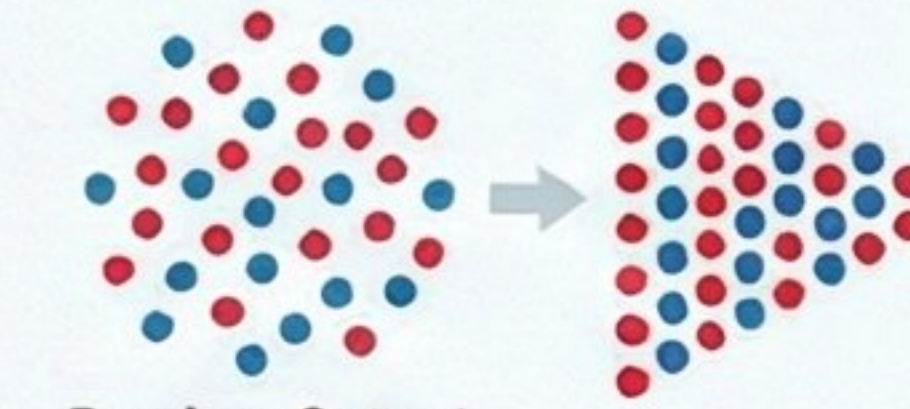

### The Group Connection: Evidence from FieldREG Experiments

#### Measuring a "Consciousness Field"

FieldREG experiments use portable REDs—devices producing truly random binary outputs—as passive monitors in group settings.

REG  
(Random  
Event  
Generator)

Random Output  
(Chance)

#### Group Coherence Creates Order from Randomness

In high-attention, emotional, or cohesive groups (meetings, rituals), RES outputs deviate significantly from chance.

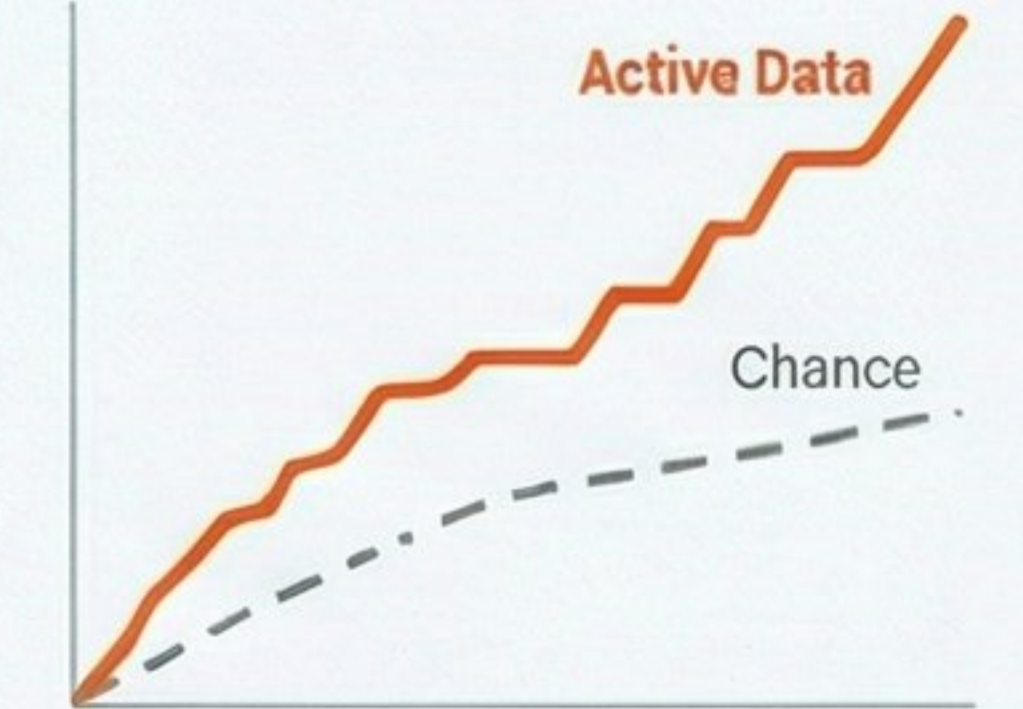

Combined results across 10 field applications showed a probability against chance expectation of  $2 \times 10^{-4}$ .

#### Passive Monitoring, Not Direct intention

The effect appears to be a byproduct of the collective "field", not explicit group intention.

#### Real-World Test Scenarios

Experiments conducted at:  
• Professional Meetings  
• Ritual Gatherings (COUPS Pagans)  
• Human Conference  
• Academy of Consciousness Studies Workshop, with consistent anomalous results.

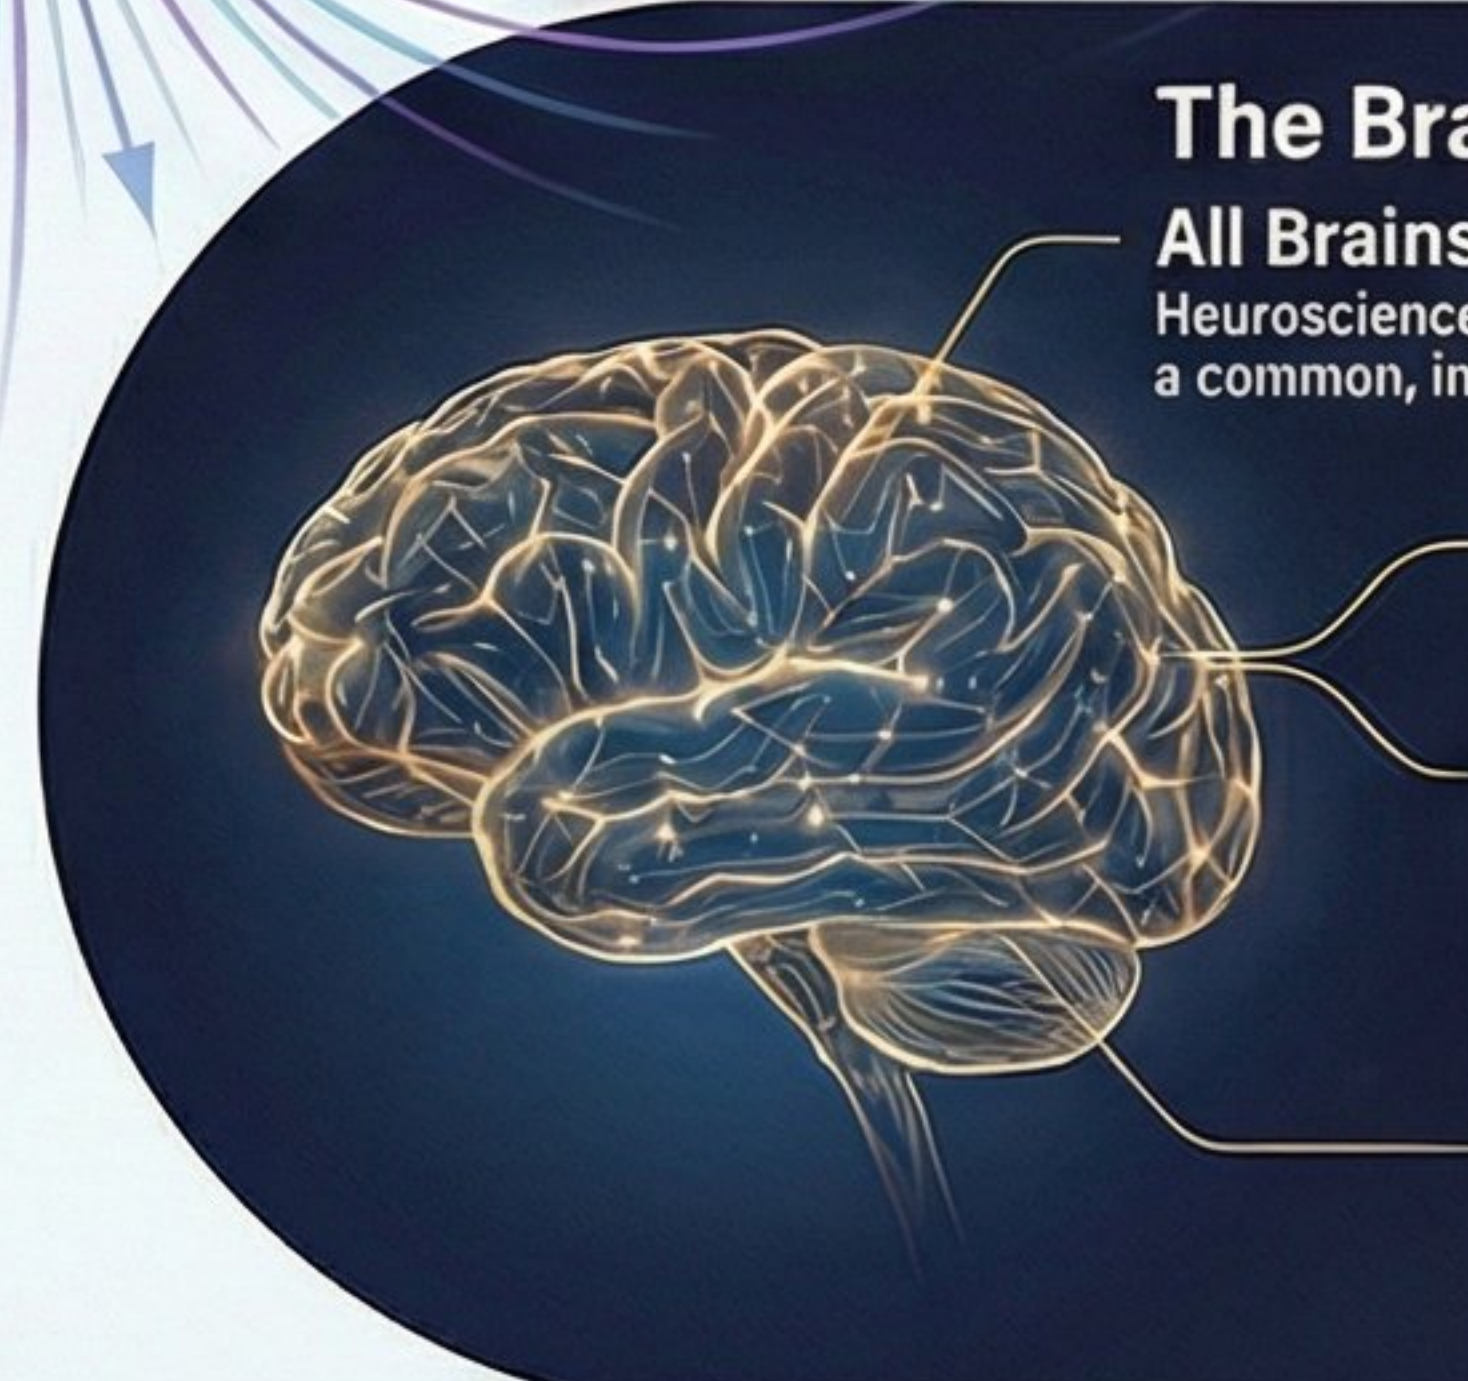

#### Visualizing the Anomaly:

Cumulative graph of 10 experiments shows cplise data trending for outside chance bounds, providing strong visual evidence.

### The Brain Connection: A Universal Mechanism

#### All Brains Operate on Fundamental Algorithms

Neuroscience suggests all human brains translate sensory information into a common, intrinsic, species-specific code.

#### Direct Brain Access is Theoretically Possible

It may be possible to bypass senses and access these codes by applying complex electromagnetic patterns with relevant information.

#### Body Temperature is the Key to Universality

Neurocognitive processes operate within a narrow temperature range (93°C to 99°C).

#### A Universal "Carrier Frequency" for Consciousness

This narrow range means a subliminal frequency around 10-11 Hz (tuning by 84 Hz) could subliminally influence every human brain.

#### Our Interconnectedness May Be Hard-Wired

This theory provides a plausible biophysical mechanism for how global fields could influence human consciousness on a massive scale, reinforcing GCI's core ideas.
